

# Accelerating time to value

The next step in  
Business Optimization

# The Current Environment

## THE WORLD HAS CHANGED

Organizations no longer operate in a linear or stable environment.

There is constant turbulence, Geo-Political turmoil, technological acceleration, uncertainty and changing customer demands.

As separate methods, Lean and Agile fall short in this new reality.

What's needed is an integrated, adaptive approach that goes beyond optimization.

## MAJOR SHIFTS

Stability & Adaptability

Standardization & Flexibility

Predictability & Experimentation

Continuous Improvement & Continous Navigation
